

Owens Flooring Specialty Color Match Process

Minimum order quantity is 1,000sf.

Specialty color match item pricing will be provided to our distributor.

There is a non-refundable fee, to process the stain sample. We require at least a 12" x 12", or as close to this size as possible, color sample piece to match from. It takes approximately 3 weeks to match the original sample from the date that it arrives at Owens Flooring from our distributor.

Once the match samples are completed, we send part of the original (retaining a piece for our records) and an Owens match sample panel to our distributor to be approved by the consumer.

If approved, a photo of the signed approved sample panel is returned to us with the P.O.

Lead time is then 6 weeks for standard 1'-8' R/L, from receipt of P.O., to manufacture the specialty stain order.

NOTE: When selecting a color on a different species, please be aware that there will be subtle differences from the originally provided sample.
